# Statistical Methods For Geography: A Student's Guide

## Synopsis

How do beginning students of statistics for geography learn to fully understand the key concepts and apply the principal techniques? This text, now in its Fourth Edition, provides exactly that resource. Accessibly written, and focussed on student learning, it's a statistics 101 that includes definitions, examples, and exercise throughout. Now fully integrated with online self-assessment exercises and video navigation, it explains everything required to get full credits for any undergraduate statistics module: Descriptive statistics, probability, inferential statistics, hypothesis testing and sampling, variance, correlation, regression analysis, spatial patterns, spatial data reduction using factor analysis and cluster analysis. Exercises in the text are complemented with online exercise and prompts that test the understanding of concepts and techniques, additional online exercises review understanding of the entire chapter, relating concepts and techniques. Completely revised and updated for accessibility, including new material (on measures of distance, statistical power, sample size selection, and basic probability) with related exercises and downloadable datasets. It is the only text required for undergraduate modules in statistical analysis, statistical methods, and quantitative geography.

## Book Information

Paperback: 424 pages

Publisher: SAGE Publications Ltd; 4th ed. edition (February 10, 2015)

Language: English

ISBN-10: 1446295737

ISBN-13: 978-1446295731

Product Dimensions: 7.3 x 1 x 9.1 inches

Shipping Weight: 1.5 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars [See all reviews](#) (3 customer reviews)

Best Sellers Rank: #268,295 in Books (See Top 100 in Books) #135 in Books > Textbooks > Social Sciences > Geography #140 in Books > Sports & Outdoors > Nature Travel > Ecotourism #178 in Books > Science & Math > Earth Sciences > Geography > Regional

## Customer Reviews

I found the book to be a solid, approachable introduction to the field; presently it's the book I recommend for students interested in learning about statistics.

All good

I would not buy this book from them. It is a made of different material than everyone else's book in my class and it is falling apart. When I write in the book and erase, the letters erase with it. WHAT? Seriously. I paid \$50 for this book for it to last and I've had it for maybe 3 weeks. Are you kidding me. Never again.
