AMC Quiet Water: New Jersey And Eastern Pennsylvania

Customer Reviews

very little info in this book for Pennsylvania. Most of what is covered is State Parks.

Gives you great almost unknown beatiful places to kayak. Let's you know what you will see as far as flora, fauna islands and much more, how long the trip may be, how deep the water is, and even how big the lake is if that applies. It also lets you know what the area is like, rural or such and of course how to get there via directions from different areas or using GPS coordinates. I am very glad I got this book and am now planning to do as many of these trips as I can this summer. Get it and have some fun, relaxation and enjoying the wildlife.

Good resource book, but, it appears that at least some of the map numbers she lists for each lake, with reference to the Pennsylvania Atlas and Gazetteer (Delorme), are incorrect. For example, she lists Lake Galena, near Doylestown, to be map #82 in the Penna. Gazetteer. It's actually on map #72. Same with Lake Nockamixon. She lists Memorial Lake State Park near Indiantown Gap as being on Gazetteer Map No. 79. It's not. It's actually on map #69. Same with Caledonia. She says Map 91, it's actually Map 81. I have the 2010 edition of Quiet Water, and am referring to the 2009 edition of the Gazetteer. I haven't checked every lake, but have only picked 4, and all 4 are wrongly numbered by a factor of 10.

This is an overall good reference guide to locations to access bodies of water. The locations are described in detail with maps and GPS coordinates. It is a good aid to plan your paddle trips. The only challenge I had being new to kayaking was matching the Table of Content formal designations with local references.

Excellent guide with description of surroundings, paddling experience, and exact (gps coord if you want them) locations for launching kayak in flat water lakes, rivers, and canals of NJ. Organized as points on a map by regions of the state. Sounds like author has visited each of more than 70 different locations to describe them in detail.
