Birds Of The Pacific Northwest: How To Identify 25 Of The Most Popular Backyard Birds

Synopsis

Newly revised! Now includes an At-a-Glance Index for easier bird identification. This edition also has separate photos of males and females, except for bird species in which the sexes are similar in appearance. We also pulled a switch-a-roo, trading out two bird species, the House Wren and the Violet-green Swallow, for the Black-headed Grosbeak and the Barn Swallow. (Never fear: The House Wren and the Violet-green Swallow will be appearing in another work, which will be coming out soon.) The Pacific Northwest is a backyard bird lover's paradise. *Birds of the Pacific Northwest: How to Identify 25 of the Most Popular Backyard Birds* will be your go-to guide when you need help identifying the birds at your feeders. Besides learning about your favorite birds, you'll discover more about their habitats, how they nest, their sometimes-quirky behaviors, and when you're most likely to see them visiting your backyard. You'll have fun as you learn to identify the following birds: American Goldfinch, American Robin, Anna's Hummingbird, Barn Swallow, Bewick's Wren, Black-capped Chickadee, Black-headed Grosbeak, Cedar Waxwing, Dark-eyed Junco, Downy Woodpecker, Evening Grosbeak, Hairy Woodpecker, House Finch, House Sparrow, Northern Flicker, Pileated Woodpecker, Pine Siskin, Purple Finch, Red-breasted Nuthatch, Red-winged Blackbird, Rufous Hummingbird, Song Sparrow, Spotted Towhee, Steller's Jay, Varied Thrush. *Birds of the Pacific Northwest: How to Identify 25 of the Most Popular Backyard Birds* includes color photographs and a hyper-linked table of contents so you can quickly jump ahead to a specific bird. Happy birding!

Customer Reviews

This book seems to have all the birds we commonly see here, with mostly decent pictures to help with identification. Here's what you get (as of the edition available in May 2014): One full color picture of each species (there's no color with an e-ink reader, of course) Interesting information on the bird (size, markings, what and how they eat, migratory patterns, mating and nesting patterns) What could be better: One or two of the bird pictures aren't very high quality (the hairy woodpecker especially) No easy/fast way to look up a bird based on what it looks like - if you don't know the name of the bird you're left with flipping through the entire book Only one picture of each bird, resting - if the male and female look different it would be nice to have a picture of the female, or the young. A picture in flight would also be a great addition. The biggest improvement for the book's target audience would be a quick-look picture index, something like the table of contents with pictures of each bird inline. The other areas for improvement can easily be covered by a larger reference once you've used this book to find the name.

I didn't need a complex, hard to read book. Just something easy, fast, informative. Love this little gem. Inexpensive and easy. I am a total beginner having fun in the backyard of Woodinville, WA. Thanks for this little bird book for the Northwest!!

This is a great little book boiling down lots of info nicely ^ . Pictures of both the female and male are provided. Great to have when you are beginning to bird ... starting out in one of the best ways Checking out the birds in you backyard! Thanks for all your hardwork purting this book together Much appreciated!

The book we have next to our back door was too general and didn't have many of the bird that come to our feeder. I bought this for my Kindle not only to identify the birds we see everyday, but to have handy when I wanted to show others what we had observed.

This is a concise easy reference guide for birds in your backyard. Not a big encyclopedia, just your own local birds. It would be a good book for kids too, as it is colorful and it makes it easy to identify

birds in your neighborhood

Covered everything we needed to know about our backyard companions in Black Diamond. Easy picture index. Perfect for those putting out bird feeders for the first time.

I downloaded the CD onto my ipad, and go bird-watching with it! Easy to follow. I have identified all the hummingbirds and finches in my backyard.

This book lets me know in a picture and a brief explanation what birds I have in my backyard in the Pacific Northwest. Exactly what I wanted.
