ISBN-13: 978-0688079130

Product Dimensions: 1 x 6.5 x 9.5 inches

Shipping Weight: 1.5 pounds

Average Customer Review: 4.9 out of 5 stars [See all reviews](#) (8 customer reviews)

Best Sellers Rank: #749,194 in Books (See Top 100 in Books) #55 in [Books > Humor &](#)

[Entertainment > Puzzles & Games > Gambling > Track Betting](#) #237 in [Books > Sports &](#)

[Outdoors > Individual Sports > Horses > Racing](#)

Customer Reviews

I should have included this book in my list of best handicapping books but it was out of print. This is not a simple book and the author assumes you are an adequate if not great handicapper. The most valuable information in this book is how to validate a handicapping method, how to create an objective value line among many other gems. The math is highschool math not Ziemba and Hausch math, although he covers the authors in this book too. I've gone back to this book many times for reference. It's a unique and valuable contribution to any handicapping library. Dylan

Alliata[...]Supporting the Sartin Methodology

This book has information that you can actually use. Whether beginner or experienced handicapper, you'll find answers to questions you never even thought to ask. This is one of the best handicapping books I've ever read. It has plenty of information that will make you a better punter, and I recommend you look at his other books as well.

Dick Mitchell was a truly amazing person who we lost far too soon. Thankfully, his clear thinking and outstanding communication about how to bet horseraces lives on in this book. Combined with a reading of Barry Meadow's Money Secrets at the Racetrack, you will have everything you need.

This is an excellent reference for the serious horse player. The appendix "Statistical Validation," which shows you how to determine how many races you need to test before you can have confidence in a new system, is worth the price of the book. Bob Pitlak, nehandicappers.org
