College Algebra (11th Edition)

Synopsis

College Algebra, Eleventh Edition, by Lial, Hornsby, Schneider, and Daniels, engages and supports students in the learning process by developing both the conceptual understanding and the analytical skills necessary for success in mathematics. With the Eleventh Edition, the authors adapt to the new ways in which students are learning, as well as the ever-changing classroom environment.

Customer Reviews

I STRONGLY suggest you RENT this textbook. I rented it for around \$25 from an marketplace seller. Unless you are a math major and love to collect math books, do yourself a favor - save some money and just rent this textbook. The suggested retail price of this textbook is insane, even used it is insanely expensive. Just rent the textbook, it will save you a ton of cash. Plus you won't have the burden of selling a used textbook, that you most likely will not get all of your money back out of. RENT IT!! I am currently taking College Algebra at my local community college, one night a week. I graduated high school in 2002, went to college for several years, but have yet to successfully complete college algebra (had to drop the class twice). I have always struggled with math, especially Algebra. I am a visual learner. Once I see a problem worked, either in person or in a book, I will understand it. With this textbook, I am really struggling to understand some of the exercises. Some of the exercises are not thoroughly explained in the review. How can they expect you just to learn how to solve for H, with the area of a trapezoid using a linear equation - if they don't give an example? I honestly hate how textbooks do this! Now, my instructor only assigns a handful

of odd numbered exercises. I of course complete the required exercises, but on my own - I work the rest of the exercises, even and odd. This textbook only provides the answers for the odd numbered problems. There is an issue with the answers in the back of the book, the sections are literally separated! For example, there are answers to "Solutions to Selected Exercises" for chapter 1.1 on page S-3. Then there are "Answers to Selected Exercises" for chapter 1.1 on page A-3.
